

Below are the complete list of Python questions for interview preparation.

1. What is Python?

Answer:

Python is a **high-level**, **easy-to-read**, and **open-source** programming language. It is used for web development, data analysis, AI, automation, and more.

2. What are the key features of Python?

Answer:

- Easy to learn and read
 - Interpreted language (runs line by line)
 - Cross-platform (runs on Windows, Linux, etc.)
 - Supports multiple programming styles (object-oriented, procedural, functional)
 - Has a huge library (for almost any task)
-

3. What is a variable in Python?

Answer:

A variable is like a **box** where you store a value (like a number, text, or list).

Example:

```
python
CopyEdit
x = 10
name = "Alice"
```

4. How do you write a comment in Python?

Answer:

Use the `#` symbol:

```
python
CopyEdit
# This is a comment
```

5. What is a data type in Python?

Answer:

A data type tells Python what kind of value it is.

Examples:

- int (for numbers like 5, 10)
 - float (for decimals like 3.14)
 - str (for text like "hello")
 - bool (for True/False)
-

6. What is a list in Python?

Answer:

A list is a collection of items in a specific order:

```
python
CopyEdit
fruits = ["apple", "banana", "cherry"]
```

7. How do you create a function in Python?

Answer:

Use the `def` keyword:

```
python
CopyEdit
```

```
def greet():  
    print("Hello!")
```

8. What is indentation in Python?

Answer:

Indentation (space before code) shows which code belongs together.

Example:

```
python  
CopyEdit  
if 5 > 3:  
    print("5 is greater") # This line is indented
```

9. What is a loop in Python?

Answer:

A loop repeats a block of code.

Example of a for loop:

```
python  
CopyEdit  
for i in range(3):  
    print("Hello")
```

10. How do you import a module in Python?

Answer:

Use `import`:

```
python  
CopyEdit  
import math
```
